

User Guide

1) Product Description

park/vision™ is a reverse vision system that helps motorists to park safely using a rearview camera providing drivers with full colour video information when reversing.

This system will provide you with assistance while parking, only by using the image transmitted by the display or in complement of the sensor detection system already fitted on your vehicle.

Datasheet:

A control screen that can be placed on the dashboard or close to the central rearview mirror

- Colour LCD screen.
- Adjustable brightness and contrast.
- Detachable screen for protection from theft.
- Built-in diagnostics function

One Rear camera

- Discreet mini-camera no bigger than a sensor.
- Horizontal wide angle.
- Also works in poor light (< 2 lux).

User Guide

2) park/vision™ Function

- The Colour screen, located on the dashboard transmits the colour images from the wide angle camera to give you clear and precise vision of the rear surroundings of the vehicle as soon as you select the reverse gear
- this system is compatible with all reversing parking assistance systems using sensors already fitted on the vehicle
 - ➔ If Valeo beep&park is already fitted, the park/vision™ display will also indicate the distance and the localisation of the obstacles located at the back of the car.
 - ➔ If the parking assistance system fitted is not a Valeo one, the 2 functions will be dissociated and the park/vision™ screen will not indicate the distance that separate the car from the obstacles.

3) park/vision™ Settings

1) Screen Settings :

- **The screen can easily be removed from its support by simply clicking it in and out.** We recommend you to remove the screen when leaving vehicle unattended to avoid theft.
- Screen setting buttons; located at the back of the display, enable you to set image positioning, luminosity and contrast in all circumstances.
- The rear camera also works in poor light (< 2 lux), and even at night

2) Volume Settings (if park/vision™ has been coupled with the beep&park® already fitted on your vehicle)

- The loudspeaker is installed in the boot of your car. It is fitted with a three positions volume switch:
 - I : mute
 - II : Normal
 - III : Loud

User Guide

Recomendations for Use:

- park/vision™ helps drivers in their parking manoeuvres but does not replace drivers' vigilance.
- We recommend you to remove the screen when leaving vehicle unattended to avoid theft.
- To maintain good visibility, make sure you keep the camera clean and avoid to place the camera in contact or close to sharp objects.
- Heavy rains, untidy camera or faulty sensor may cause image to scramble temporary.
- If you wish to connect beep&park®/vision™ with your Satellite Navigation System, ask you approved auto technician to check compatibility.
- Please do not modify or repair the product on your own. It may cause malfunctions as well as serious damage to the product and vehicle.
- Make sure to protect the screen and the film from liquid projections while cleaning the inside of the car. Water may cause damage to electronic circuits and cause electric shock.
- Avoid contact with chemical products and detergents as they may case damages to the surface as well as internal component of the product.
- Avoid all mechanical shock that may cause permanent damage to electronic and electrical components and lead to a functional deteriorations
- If the system does not beep, check that the volume level is not set as minimum.
- In case of an accident, spare parts are available through your usual distribution channel.

Valeo may not be held responsible for the incorrect installation or misuse of the products.
